WELCOME TO A WORLD OF BUILDING FUN!

LEGOLAND® sets offer a whole world of building possibilities. They're LEGO® sets you can build, collect, and best of all, connect together.

This book is full of ideas for new things to build. You can make a town, a village or a large metropolis. The LEGOLAND Road Plates will create a complete road system. Or use the LEGOLAND Crater Plates to help create your own space station. Now there are more ways than ever to combine your LEGO sets!

HOW TO USE YOUR LEGOLAND IDEA BOOK

This book is presented like a story. Just follow our two Mini-Figures™, Mary and Bill, as they build their LEGOLAND home and community and then move on to other adventures by car, on foot, and finally by spaceship. Along the way you'll find lots of ideas for building, designing and combining: how to build an airport, or a spaceship, how to put on a circus, how to light up your town at night.

The LEGOLAND IDEA BOOK also has a page of decals, which you can add to your sets for greater realism.

The actual building instructions are given in easy-to-follow pictures, not words. That's because this same Idea Book is used by children in Japan, Germany, Sweden, Australia and many other lands. People don't all speak the same language, but everyone enjoys building with LEGO bricks.

Now follow our friends on their journey... and happy building!
